Track Your Sugar Status Regularly With Accurate & Reliable Reports

HbA1c

@ ₹420*/-

Significance

The HbA1c test measures the average blood sugar (glucose) levels over the past 2-3 months and is commonly used to diagnose and monitor diabetes, providing a long-term view of blood sugar control. It also helps with the screening, diagnosis and monitoring of diabetes or prediabetes in adults and enables you to identify if you are on the edge of developing diabetes. If you already have diabetes mellitus, the HbA1C test results help monitor your blood sugar levels.
