Early Detection and Accurate Diagnosis

Sinus Issues

Lung & Kidney Problems

Autoimmune Disorder

Significance

The PR3-ANCA (C-ANCA) test checks for antibodies against an enzyme called proteinase 3, found in certain white blood cells. These antibodies are often linked to autoimmune diseases, especially granulomatosis with polyangiitis (GPA), a condition that causes inflammation in blood vessels. The test helps doctors diagnose and monitor such conditions, especially when symptoms like sinus issues, lung problems, or kidney trouble are present.

PR3 - ANCA (C-ANCA)
