

A Guiding Test for **Blood Health**

Erythropoietin

@ ₹900/-

Significance

The test measures the level of erythropoietin, a hormone produced primarily by the kidneys that stimulates the production of red blood cells in the bone marrow. This test is often used to diagnose the cause of anaemia, assess bone marrow function and evaluate anaemia, monitor chronic kidney disease or investigate unusual red blood cell production.

First National Diagnostic Chain to have **100%** of its Labs with **NABL Accreditation**#

CAP From 2007

Trust that Thyrocare reports are **Accurate & Reliable***

Reports are released within an average **TAT of ~3.5 hours** of samples reaching the lab

*#As on 5th December 2024 | *As per a survey on doctors' perception of laboratory diagnostics (IJARIIT, 2023)*
