Hormonal Health Check for Reproductive Well-Being of Male and Female

Significance

The Follicle Stimulating Hormone (FSH) test measures the level of FSH, a hormone produced by the pituitary gland that plays a key role in sexual development and reproductive health. This test is commonly used to evaluate fertility issues, diagnose conditions like polycystic ovary syndrome (PCOS), menopause, or menstrual irregularities in women and test for low sperm count or testicular dysfunction in men.

Follicle Stimulating Hormone (FSH)
