Your Defense Against Hepatitis B Starts with a Single Test

Hepatitis B Surface Antibody (Anti-HBS)

@ ₹ 1,020/-

Significance

The Hepatitis B Surface Antibody (Anti-HBs) test is used to detect antibodies against the hepatitis B virus (HBV) surface antigen. A positive result means the person is protected against HBV, while a negative result suggests no immunity and the potential need for vaccination. This test is crucial for evaluating immune status, especially in healthcare workers, pregnant women and individuals at risk of HBV exposure.

First National Diagnostic Chain to have **100%** of its Labs with **NABL Accreditation**#

CAP
From 2007

Trust that Thyrocare reports are **Accurate & Reliable***

Reports are released within an average **TAT of ~3.5 hours** of samples reaching the lab
