

Screen For Syphilis

With the Quick And Reliable Test

Significance

The VDRL (Venereal Disease Research Laboratory) or RPR (Rapid Plasma Reagin) test is used to screen for syphilis, a sexually transmitted infection caused by the bacteria Treponema pallidum. It detects antibodies that the body produces in response to the infection, rather than the bacteria itself. This test is commonly used for early detection and monitoring of treatment response.

VDRL (RPR) For Syphilis

@ ₹250/-

First National Diagnostic Chain to have **100%** of its Labs with **NABL Accreditation**#

CAP
From 2007

Trust that Thyrocare reports are **Accurate & Reliable***

Reports are released within an average **TAT of ~3.5 hours** of samples reaching the lab

*#As on 5th December 2024 | *As per a survey on doctors' perception of laboratory diagnostics (IJARIIT, 2023)*
