Prevent Complications and Ensure Safety for You and Your Baby

Indirect Coombs Test

@ ₹690/-

Significance

The test detects antibodies in the blood that may attack red blood cells. It is commonly performed during blood compatibility testing for transfusions and during prenatal screening in pregnant women. Overall, the Indirect Coombs Test is vital in ensuring safe blood transfusions and healthy pregnancies.

First National Diagnostic Chain to have **100%** of its Labs with **NABL Accreditation**#

CAP From 2007

Trust that Thyrocare reports are **Accurate & Reliable***

Reports are released within an average **TAT of ~3.5 hours** of samples reaching the lab
