Urine Culture and Susceptibility

@ ₹945/-

Significance

The test detect and identify bacterial or fungal infections in the urinary tract (UTI) and determine the most effective treatment. This test isolates microorganisms causing the infection and evaluates its susceptibility to various antibiotics or antifungal medications. It is commonly recommended in case of common urinary symptoms, as a routine medical exam, pregnancy checkup or pre-surgery preparation.

First National Diagnostic Chain to have **100%** of its Labs with **NABL Accreditation**#

CAP
