

Small Dense LDL

@ ₹550/-

Significance

The test is recommended along with other lipid tests to evaluate the risk of lipoprotein disorders associated with cardiovascular/heart diseases. People with high levels of SdLDL in the blood are at higher risk of myocardial infarction (heart attack). Hence, this test is recommended to people with a family history of or a personal history of heart disease or inactive/sedentary lifestyle.

First National Diagnostic Chain to have **100%** of its Labs with **NABL Accreditation**#

CAP
From 2007

Trust that Thyrocare reports are **Accurate & Reliable***

Reports are released within an average **TAT of ~3.5 hours** of samples reaching the lab

*#As on 5th December 2024 | *As per a survey on doctors' perception of laboratory diagnostics (IJARIIT, 2023)*
