

Test for Early & Accurate Detection of a Common STI

Significance

The Trichomonas Vaginalis PCR test is used to detect the genetic material (DNA) of Trichomonas vaginalis, a parasite that causes the sexually transmitted infection trichomoniasis. This test is highly accurate and can identify the infection even when there are no symptoms, helping in early diagnosis and proper treatment to prevent complications and transmission to others.

Trichomonas Vaginalis PCR

₹3920/-

First National Diagnostic Chain to have **100%** of its Labs with **NABL Accreditation**

CAP
From 2007

Trust that Thyrocare reports are **Accurate & Reliable***

98% Reports released **Within 06 hours** after samples reach the lab

*As on 5th December 2024 | *As per a survey on doctors' perception of laboratory diagnostics (IJARIIT, 2023)
