Are you suffering from

- Unexplained weight gain or loss
- Fatigue
- Depression

- Hair Loss
- Mood Swings
- Dry Skin
- Anxiety

TSH - Ultrasensitive

@ ₹260/-

Significance

The TSH - Ultrasensitive test is used to assess the functioning of the thyroid gland. It measures the level of Thyroid Stimulating Hormone (TSH) in the bloodstream and is especially useful for detecting early-stage thyroid dysfunctions such as hypothyroidism (underactive thyroid) & hyperthyroidism (overactive thyroid). This test is often recommended for routine thyroid screening, monitoring thyroid treatment, or investigating symptoms like fatigue, weight changes, or menstrual irregularities.

First National Diagnostic Chain to have **100%** of its Labs with **NABL Accreditation**#

CAP From 2007

Trust that Thyrocare reports are **Accurate & Reliable***

Reports are released within an average **TAT of ~3.5 hours** of samples reaching the lab

*#As on 5th December 2024 | *As per a survey on doctors' perception of laboratory diagnostics (IJARIIT, 2023)*
