Track Your **Immune System Defenders**

CD3 | CD4 | CD8

Significance

The CD3, CD4 and CD8 test is used to measure the levels of specific types of T-cells, which are important parts of the immune system. CD3 cells represent the total T-cell count, CD4 cells help coordinate the immune response and CD8 cells help kill infected or cancerous cells. This test is commonly used to monitor immune health in people with conditions like HIV/AIDS and to assess how well the immune system is functioning.
