# Protect Your Baby's Development From the Start with Thyroid Testing

## Significance

The NEOT Test measures Neonatal Total Thyroxine (T4) and Thyroid Stimulating Hormone (TSH) levels in newborns to assess thyroid function. This test helps in the early detection of congenital hypothyroidism, a condition that can affect growth and brain development if left untreated. Early diagnosis allows timely treatment, ensuring healthy development in newborns.

## NEOT (2 Parameters)

**₹341/-**

- Neonatal total thyroxine (T4)
- Neonatal thyroid stimulating hormone # (TSH)

First National Diagnostic Chain to have **100%** of its Labs with **NABL Accreditation**[#]
