Detection of Past and Present Exposure

LEPTOSPIRA RAPID TEST (IGG/IGM)

@ ₹665/-

- Leptospira - IgG rapid test
- Leptospira - IgM rapid test

Significance

The test detects IgG and IgM antibodies to Leptospira bacteria, which cause leptospirosis--an infection transmitted through contaminated water or contact with infected animals, leading to symptoms ranging from mild flu-like signs to severe complications affecting the liver, kidneys, or lungs. The presence of IgM antibodies indicates a recent or active infection, while IgG antibodies suggest past exposure.

First National Diagnostic Chain to have **100%** of its Labs with **NABL Accreditation**#

CAP From 2007

Trust that Thyrocare reports are **Accurate & Reliable***

Reports are released within an average **TAT of ~3.5 hours** of samples reaching the lab
