

Spot Typhoid Early With the Widal Tube Test

Widal Tube Agglutination

@ ₹480/-

(4 Parameters)

- Salmonella paratyphi – A (H)
- Salmonella paratyphi – B (H)
- Salmonella typhi – H
- Salmonella typhi - O

Significance

The Widal Tube Agglutination test is used to help diagnose typhoid fever. It detects specific antibodies (O and H) that are produced in response to infection with Salmonella typhi or Salmonella paratyphi. The test helps identify if a person has a current or recent typhoid infection, especially when symptoms like prolonged fever, abdominal pain and weakness are present.

100's ACCREDITED LABS

First National Diagnostic Chain to have **100%** of its Labs with **NABL Accreditation**#
