

# Good VS. Bad Cholesterol Let the Real Ratio Speak For Your Heart Health

## Significance

The Apolipoprotein Ratio test measures the balance between two key proteins—Apolipoprotein B (ApoB) and Apolipoprotein A1 (ApoA1)—that carry cholesterol in your blood. ApoB is linked to "bad" cholesterol (LDL), which can clog arteries, while ApoA1 is associated with "good" cholesterol (HDL), which helps remove fats from the bloodstream. The ratio between them provides a more accurate assessment of your heart disease risk than traditional cholesterol tests.

## Apolipoprotein Ratio (3 Parameters)

**₹935/-**

- Apo b / apo a1 ratio (apo b/a1)
- Apolipoprotein - a1 (apo-a1)
- Apolipoprotein - b (apo-b)

First National Diagnostic Chain to have **100%** of its Labs with **NABL Accreditation**#

**CAP** From 2007

Trust that Thyrocare reports are **Accurate & Reliable***

**98% Reports** released **Within 06 hours** after samples reach the lab
