

Know the Ratio to Maintain Your Kidney Health and Function

Significance

The Serum BUN-Creatinine Ratio test measures the levels of blood urea nitrogen (BUN) and creatinine to evaluate kidney function and overall metabolic health. By comparing these two values, the test helps determine whether kidney problems, dehydration, or other conditions affecting protein metabolism or kidney function may be present.

Serum Bun-Creatinine Ratio (3 Parameters)

₹385/-

- Bun / Sr.creatinine Ratio
- Blood Urea Nitrogen (BUN)
- Creatinine - Serum

First National Diagnostic Chain to have **100%** of its Labs with **NABL Accreditation***

CAP
From 2007

Trust that Thyrocare reports are **Accurate & Reliable***

98% Reports released **Within 06 hours** after samples reach the lab
