Protect Your Liver Health Begin with Bilirubin Check

Significance

The Indirect Bilirubin test measures the level of unconjugated bilirubin, a substance produced when red blood cells break down. Elevated levels may indicate conditions such as liver disorders, hemolytic anemia, or excessive breakdown of red blood cells. This test helps assess liver function and diagnose the cause of jaundice.

Indirect Bilirubin (3 Parameters)

₹330/-

- Bilirubin - Direct
- Bilirubin (Indirect)
- Bilirubin - Total

First National Diagnostic Chain to have **100%** of its Labs with **NABL Accreditation***

CAP From 2007

Trust that Thyrocare reports are **Accurate & Reliable****

98% Reports released **Within 06 hours** after samples reach the lab

**As on 5th December 2024 | **As per a survey on doctors' perception of laboratory diagnostics (IJARIIT, 2023)*
