Your First Line of Defence Against Cytomegalo Virus

Cytomegalo Virus (CMV) - IgM

@ ₹ 341/-

Significance

Cytomegalovirus (CMV) is a common virus from the herpes family, and testing for CMV-specific IgM antibodies helps diagnose an active or recent CMV infection. While CMV infections are often mild or asymptomatic in healthy individuals, they can cause severe complications in immunocompromised people, newborns, pregnant women and people with weakened immune systems.

First National Diagnostic Chain to have **100%** of its Labs with **NABL Accreditation**#
