Don't Let Hidden Infections Harm Your Gut Detect H. pylori Early with Stool Test

Significance

The Helicobacter pylori Antigen Rapid Stool is a simple & non-invasive test used to detect the presence of Helicobacter pylori bacteria, a bacteria that infects stomach lining. This bacteria is a common cause of stomach infections, gastritis and peptic ulcers. The test helps in quickly diagnosing an active infection by identifying bacterial antigens in the stool, making it useful for both initial detection and for monitoring treatment effectiveness after therapy.
