Key Marker Test for Monitoring of Gastrointestinal & Ovarian Cancer

CA 72.4-Gastric Cancer Marker

@ ₹ 1500/-

Significance

The CA 72.4 – Gastric Cancer Marker Test measures the level of the CA 72.4 protein, which may increase in certain cancers. This test is primarily used in the monitoring of gastrointestinal and ovarian cancer. Physicians rely on this test to track treatment response and detect potential recurrence. It is NOT used as a screening test for cancers. Since CA 72.4 can also rise in some other cancers, this test is used along with other clinical evaluations and imaging for a clearer assessment.

First National Diagnostic Chain to have **100%** of its Labs with **NABL Accreditation**[#]	**CAP** From 2007	Trust that Thyrocare reports are **Accurate & Reliable***	**98% Reports** released **Within 06 hours** after samples reach the lab
