

Watch Out For Symptoms

- Itching in Mouth
- Skin Rashes
- Stomach Upset
- Swelling
- Sneezing

Significance

The Allergy Milk (By Phadia) test helps identify whether you have an allergic reaction to milk. It measures specific IgE antibodies to detect milk allergy by the Immunocap Assay. It helps doctors understand the cause of allergic reactions, such as skin rashes, stomach discomfort, vomiting, or breathing problems, that occur after consuming milk.

First National Diagnostic Chain to have **100%** of its Labs with **NABL Accreditation**[#]

CAP From 2007

Trust that Thyrocare reports are **Accurate & Reliable***

Reports are released within an average **TAT of ~3.5 hours** of samples reaching the lab
