A Key Test for Those at Risk of

Clotting

Pregnancy Related Conditions

Autoimmune Disorders

Significance

The Anti Phospholipid Antibody (APL) - IgM test detects the presence of IgM antibodies against phospholipids, these antibodies are associated with antiphospholipid syndrome (APS), an autoimmune disorder that can lead to increased risk of blood clots, recurrent miscarriages and other complications. This test helps in diagnosing APS and evaluating unexplained blood clotting issues, pregnancy loss, or autoimmune conditions like lupus.
