Identify Multiple Flu Infections in a Single Test

Significance

The Viral Flu Panel (Influenza A B H3N2 H1N1 RSV) Qualitative RT-PCR test is a diagnostic test that detects common flu-causing viruses in the body. Using advanced RT-PCR technology, it identifies whether any of these viruses are present, even in the early stages of infection. This helps doctors quickly confirm the cause of symptoms like fever, cough, sore throat, or breathing issues and start the right treatment. Early and accurate detection also helps prevent complications and limits the spread of infection.

Viral Flu Panel (Influenza A B H3N2 H1N1 RSV) Qualitative RT-PCR (5 Parameters)

₹3585/-

- Respiratory Syncytial Virus
- H1N1 Influenza A (PDM09)
- H3N2
- Influenza A
- Influenza B

First National Diagnostic Chain to have **100%** of its Labs with **NABL Accreditation**[#]

CAP From 2007

Trust that Thyrocare reports are **Accurate & Reliable***

Reports are released within an average **TAT of ~3.5 hours** of samples reaching the lab
