

Check Your Viral Safety Status With Triple H Screening

Triple H (3 Parameters)

@ ₹1,065/-

- **Infectious Diseases (2)**
  HIV I and II
  Hepatitis B Surface Antigen (HBsAg)
- **Anti Hepatitis C Virus (Anti HCV) - Total**

Significance

The Triple H Profile is a focused 3-parameter screening designed to check for major infectious diseases that impact overall health. It helps detect if one has HIV, Hepatitis B or Hepatitis C. These tests are done by CMIA technology. This test is recommended for routine health checkups, before surgeries, during pregnancy, for blood donors, those on dialysis or before marriage, to check if they or their partner are free from these infectious diseases. It helps in early detection, prevention and timely medical care.
